

Mejec-PS-H(A)

Direct drinking machine, purifying drinking machine

Product Features

Multistage filtration

It can effectively remove impurities, heavy metals, bacteria, and other odors

Multi-Stage Sterilization

It can eliminate 99.99% of bacteria, thus providing safe drinking water

Touch control

Real-time TDS detection, filter life display, and real-time temperature display

High-Efficiency Water Production

Ready to drink instantly, with the freedom to switch between hot, warm, and cold water

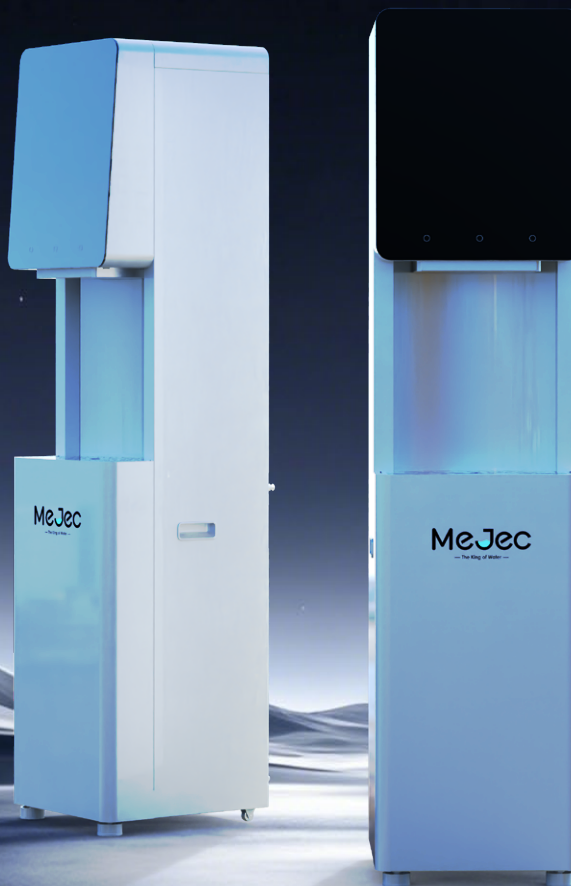

Safety lock

The hot water safety lock is designed to prevent accidental operation, ensuring peace of mind for users

Large screen

The screen of this machine can display images, videos, etc., which can be used for corporate promotion and advertising

Product parameters

Product Model	PS-H(A)
Outlet Type	hot + warm + cold(Customized to Your Requirements)
Filtration stage	Multi-stage Filtration
Treatment Process	PP+UDF+RO+CTO
Flow Rate	1.2-1.7L/min
Rated Voltage	220V
Boiling water temperature	≥90°C
Inlet water temperature	5-38°C
Heating Power	0.7-2KW
Applicable Water Source	Municipal Tap Water
Applicable water pressure	0.1MPa-0.4MPa
Product Dimensions	400*400*1690mm
20°C/40°C	75/150sets

Applicable scenarios

Enterprise municipal unit

School/Hospital

Hotel/shopping mall

Transportation Hub

Airport

Office

Factory

Beverage shop

The king of water

Mejec is committed to providing you, your family, and your business with pure, safe, and exceptionally tasty drinking water
